

Special Alaska Lease Sale Areas (SALSA)

Preview of large, contiguous lease sale blocks intended to be offered in Fall 2018 Competitive Oil & Gas Lease Sales

**Presented by the Division of Oil and Gas
Alaska Department of Natural Resources
July 2018**

This slide show will function best if you save the .pdf to your device and run it from there. This makes use of the links easier.

Updated: 08/20/2018

Dear Explorers and Investors,

The State of Alaska would like to offer a new opportunity to bid on large, contiguous acreage blocks. The sale is scheduled to happen concurrently with the Fall 2018 Competitive Oil and Gas Lease Sale. These unique lease sale blocks are groups of North Slope and Beaufort Sea Areawide lease sale tracts that will be offered together as Special Alaska Lease Sale Areas (SALSA). The Division of Oil and Gas has gathered and highlighted large amounts of publicly available data that bears on the SALSA areas. With respect to this information please review the important [disclaimer](#) at the end of this presentation.

Additionally, each lease sale block has 3D seismic data acquired through the State of Alaska Tax Credit Program that is currently available through the Department of Natural Resources for a modest fee.

This compilation is meant to give you a jump start in understanding what data is available for the lease sale blocks. Sources of the data are also provided so you can expand your search to areas outside of the SALSA. This rich and insightful information will help you interpret and evaluate Alaska's resources more quickly. The terms and conditions for the SALSA sale will be available in mid-August when the public notice is released.

I believe that you are set up for success with this data in hand and I look forward to seeing you at the Sale.

Chantal Walsh, Director

For detailed, formal information on the Fall 2018 Competitive Oil and Gas Lease Sales <http://dog.dnr.alaska.gov/Services/BIFAndLeaseSale> where updated material will be posted as available.

Geologic Materials Center - Inventory

On-line Inventory

Our live on-line inventory dataset (right) includes oil and gas well locations, mineral prospect locations, sample types, box-level details, and additional metadata for over 90% of the archived samples available at the Alaska GMC. The interactive inventory allows users to quickly and easily view details of the sample repository before visiting the facility. If you do not find materials appropriate to your research needs, please [contact us](#) at the GMC. We have search capabilities not available through the web search interface.

What do we have?

The Alaska GMC in Anchorage holds non-proprietary rock core and cuttings that represent more than 16.7 million feet of unique energy exploration and production drilling samples and 76,000 linear feet of continuous core from more than 3,000 exploratory or production wells on Federal, State, and private lands in Alaska, including the Alaska outer continental shelf (map image, right). Additionally, the collection holds more than 354,000 linear feet of diamond-drilled hard-rock mineral core representing more than 2,100 exploratory and geotechnical boreholes. USGS, USBOM, USBLM, and energy industry archives are merged at the GMC to form a state-wide collection of 350,000 surface rock and sediment samples. Our catalogue of more than 198,000 processed slides contains a world-class palynology collection and numerous other microfossil, organic and petrographic thin sections, sediment, and thermochronology glass slides. Extensive geological and geochemical results derived from all third-party sampling of GMC materials are maintained in unreviewed [data and reports](#) and Alaska air USGS photos.

Complete PDF Edition Week of June 10, 2018

- **ANWR seismic is planned - 06/10/2018** SAExploration Inc., Arctic Slope Regional Corp. and Kaktovik Inupiat Corp. have filed with the federal Bureau of Land Management a plan for a proposed 3-D seismic survey program in the 1002 area of the Arctic National Wildlife Refuge. The program, referred to as the Marsh Creek 3-D, would encompass...
- **LNG giants teaming up - 06/10/2018** One more building block has fallen into place to secure the future of LNG Canada, putting the C\$40 billion project in sight for a final investment decision before year's end. Petronas, Malaysia's state-owned energy giant, announced it is taking an equity position — without disclosing the investment....
- **Pentex sale close deferred - 06/10/2018** In the latest twist in the Alaska Industrial Development and Export Authority's Interior Energy Project, the AIDEA board has extended to June 14 the timeframe for closing the sale of Pentex Natural Gas Co. to the Interior Gas Utility. The intent had been to close the sale by the end of May. The conc....
- **Conoco closes on west NS purchase - 06/10/2018** ConocoPhillips said June 4 that it has obtained approvals for the acquisition of Anadarko Petroleum Corp.'s 22 percent lease interests in the western North Slope of Alaska. ConocoPhillips announced the acquisition Feb. 1, saying at that time that it had signed a definitive agreement with Anadarko f....
- **Washington state, BC share concerns - 06/10/2018** An informal Pacific Coast cross-border alliance is taking shape in opposition to the movement of crude oil to export terminals connecting North America with energy hungry Asian markets. And the loose partnership of British Columbia, Washington, Oregon and California has gathered momentum now that Ca....
- **AIDEA converts its Mustang ownership interest to loan financing - 06/10/2018** During its May 31 meeting the board of the Alaska Industrial Development and Export Authority passed a resolution converting its ownership interests in the Mustang oil field on the North Slope to a loan to CaraCol Petroleum LLC, one of the field's working interest owners. The deal involves AIDEA sel....
- **Alyeska sets summer maintenance - 06/10/2018** It's planned maintenance season in Alaska, with Alyeska Pipeline Service Co. announcing several pipeline shutdowns this summer. The company said May 31 that the line-wide shutdowns, from 12 to 18 hours, allow for maintenance work along the line and at the Valdez Marine Terminal "while the pipeline l....
- **ANS production down marginally in April - 06/10/2018** Alaska North Slope crude oil production averaged 513,257 barrels per day in April, down 0.7 percent, 3,612 bpd, from a March average of 516,869 bpd, and down 5.5 percent from an April 2017 average of 543,252 bpd. Production data is from the Alaska Oil and Gas Conservation Commission, which provides....

- **Balash promotes more federal cooperation - 06/10/2018** During a speech at the Alaska Oil and Gas Association's annual conference on May 31 Joe Balash, assistant secretary for lands and minerals management in the U.S. Department of the Interior, said that the federal administration is intent on taking more of a partnership approach when working with the....
- **Hilcorp seeks RCA Drift River approval - 06/10/2018** Cook Inlet Pipe Line Co., a subsidiary of Hilcorp Alaska, has asked the Regulatory Commission of Alaska to authorize the permanent decommissioning of the Drift River Terminal and its associated infrastructure on the west side of Cook Inlet. Hilcorp is engaged in a project to reconfigure its Cook Inl....
- **Contraction planned for Redoubt unit - 06/10/2018** In a reflection that the revival of the Redoubt unit has arrived at a new phase, Glacier Oil & Gas Corp. has asked the state to contract the unit and to form a new participating area. Through its subsidiary Cook Inlet Energy LLC, the company made the application in November 2017 to comply with a sta....
- **Hilcorp buying Exxon out of Endicott line - 06/10/2018** Hilcorp Alaska acquired certain of BP's North Slope assets in early 2014, including all of BP's interests in the Endicott and Northstar oil fields and a 50 percent interest in Liberty and Milne Point. BP's interests in oil and gas pipelines associated with those fields were also included. Hilcorp a....
- **Exxon aims to boost earnings, production - 06/10/2018** Exxon's CEO says the company can more than double its earnings by 2025 and will invest in new oil and gas production even if policymakers adopt rules to combat climate change. Darren Woods told shareholders May 30 that technology like biofuels will allow the company to produce energy with lower car....
- **BLM retains ANWR public comment deadline - 06/10/2018** The federal Bureau of Land Management announced on June 4 that it will not extend the public comment period for the scoping of an environmental impact statement for an oil and gas lease sale program for the coastal plain of the Arctic National Wildlife Refuge. As previously determined, the comment p....
- **Final protesters removed from perches - 06/10/2018** The final two protesters who had perched themselves on trees and poles to block construction of a natural gas pipeline through Appalachia have come down. The Roanoke Times reports one protester was forcibly removed June 1 and another came down voluntarily as authorities approached. The June 1 action....
- **National rig count rises by 1 to 1,060 - 06/10/2018** The number of rigs drilling for oil and natural gas in the U.S. increased by one the week ending June 1 to 1,060. At this time a year ago there were 916 active rigs. Houston oilfield services company Baker Hughes reported that 861 rigs drilled for oil (up two from the previous week) and 197 for gas....

Tools for more information on Leases

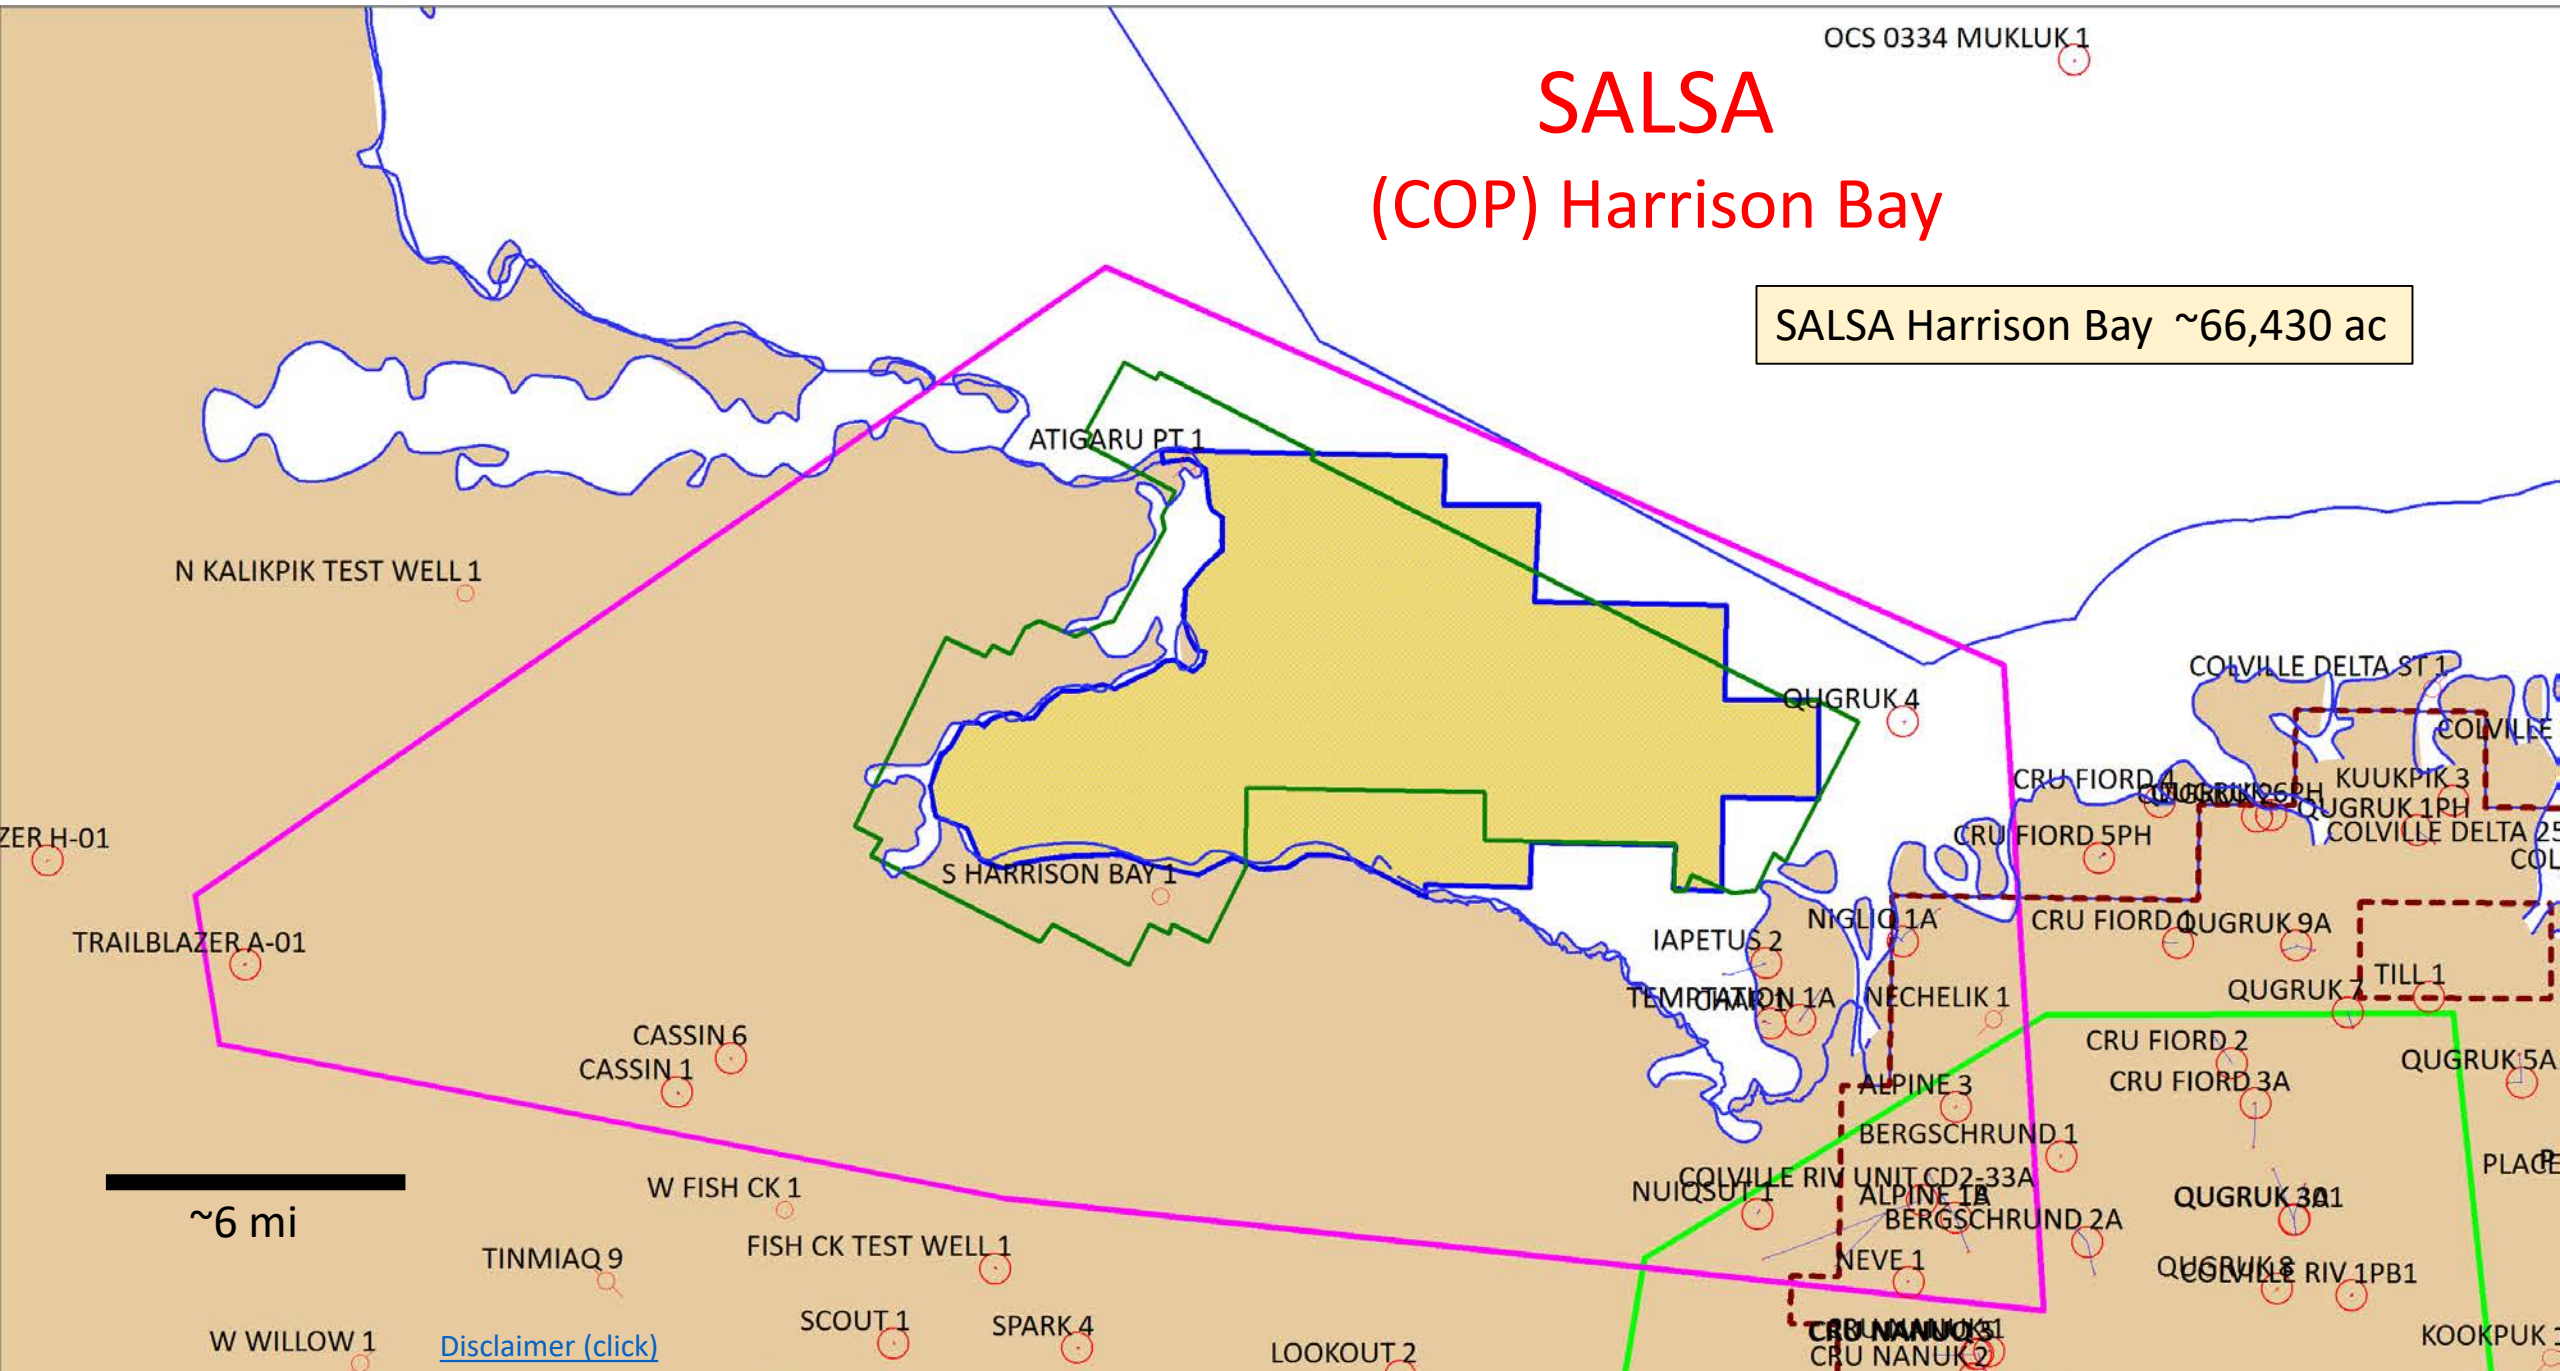

DNR provides online tools for researching land title, lease status, leasing history, and recorded documents within a lease sale tract (LST) or meridian, township, range, and section (MTRS). The US Department of Interior Bureau of Land Management (BLM) provides tools for researching land title and federal land surveys by MTRS. In addition, DO&G physical case files for oil and gas leases may be reviewed on request. Call (907)269-8800 or email dog.leasing@alaska.gov for more information. These online research tools are available at:

- DNR Land Administration System (LAS) – <http://dnr.alaska.gov/projects/las/>
- DNR Land Records – <http://dnr.alaska.gov/landrecords/>
- DNR Alaska Mapper – <http://dnr.alaska.gov/MapAK/>
- DNR Recorder's Office – <http://dnr.alaska.gov/ssd/recoff/>
- BLM Spatial Data Management System (SDMS) – <http://sdms.ak.blm.gov/>

Requesting Data from AOGCC

Digital Well Logs

Digital data from wells on State lands can be obtained by contacting AOGCC Customer service.

Note: Please submit a completed data request form attached to your request.

Data Request Form: <http://doa.alaska.gov/ogc/data/DataReqst.pdf>

AOGCC Website: <http://doa.alaska.gov/ogc/>

Fill out the data request form

Provide well name and either API number or permit to drill (PTD) number

Additional wells (13+) should be attached in an excel file

A maximum of 30 wells may be requested per form

Email the signed request form to **aogcc.customer.svc@alaska.gov**

The AOGCC also provides a complete copy of all public digital log data with a catalog. The copy requires an empty 3TB hard drive, Windows formatted, with a USB 3.0 connection.

The AOGCC has 10 business days to respond to a public data request
